- GSM 07.07 (pass through)
- GSM 07.05 (pass through)
- Console Compatible
- External Antenna Output

### iSpace iDEN

#### SyTech's Cellular/Push-to-Talk Interface Card

The iSpace iDEN Radio Card integrates the Motorola iO270 Module with the convenience and dependability of a standalone interface card. iSpace provides cellular and/or push-to-talk connectivity to users seeking a simplified solution to digital voice and data pass through. iSpace emulates the handheld iDEN device to include popular features such as Digital Cellular Voice, Packet Data Transfer and Push-to-Talk Digital Dispatch

Used in conjunction with scalable iDock chassis, iSpace users can load up to eight in-line iSpace cards ideal for Industrial, Commercial and Government applications. iSpace can be configured for seamless operation with a variety of computer aided dispatch programs and interoperability software solutions.

# iSpace iDEN with 8-Channel iDock and iTwin

8-Channel iDock

## Specifications

### Electrical Frequency

TX 806-825 MH  
TX 896-902 MH  
RX 935-941 MH

### SIM Card

64K SIM  
3 OV

### TX Power

0.6W 800 MHz  
0.6W 900 MHz

### Physical (iDock)

Rack Space: 3U  
Dimensions: 19"W, 9"D, 5.25"H  
Weight: 6 lbs (Chassis w/ 8 cards)  
Voltage: 120V AC  
Two-Channel Chassis also available

### LED Status Indications

Registration  
In Service  
In Use  
No Service

### AT Command Set

GSM 07.07 (Pass-Through)  
GSM 07.05 (Pass-Through)  
Open Source Motorola Commands  
RALP Version also available (RIOS-iDEN-R)

### Compatible Consoles and Part Number (not inclusive)

SyTech (RIOS-iDEN)  
Avtec (RIOS-iDEN)  
Telex (RIOS-iDEN-R)  
Zetron (RIOS-iDEN-R)
